ACA X · AI FOR PRODUCT MANAGERS

The AI-Native PM Resource Hub

Everything from the course in one place: your setup, the one prompt that matters, all 8 session decks, the tools, and the rules that keep you safe. Bookmark this. It is your field kit for after the course.

1. START HERE

Setup guide

Get Claude Code running in about 30 minutes. Mac and Windows.

Open the setup guide →

The Field Kit (PDF)

The R·C·T·C prompt, the best PM prompts, and the principles, on one sheet.

Download the Field Kit →

2. THE ONE SKILL: THE R·C·T·C PROMPT

R ole	Tell it who to be. "You are a senior product manager at a bank."
C ontext	Give it the facts, the files, the constraints. The more real context, the better the output.
T ask	One clear ask, and the exact output you want. "Draft a one-page PRD with edge cases, as a table."
C ritique	Close the loop. Ask it to check its own work, or you check it, then iterate once. Never ship the first draft.

Rule of thumb: a weak answer is almost always a weak prompt. Add role, add context, ask for a format, then critique.

3. ALL 8 SESSIONS

The full decks, always up to date. Flip through with the arrow keys.

Session 1: AI Foundations, how AI really works. Open

Session 2: Set up and run your AI-native workspace. Open

Session 3: From research to spec, PRDs and stories. Open

Session 4: Data, decisions and experiments, no SQL. **Open**

Session 5: Communicating, stakeholders and visual design. **Open**

Session 6: Building AI features and agents, build the judge. **Open**

Session 7: Capstone I, vibe-code a prototype or MVP. **Open**

Session 8: Capstone II, ship it live. **Open**

4. YOUR TOOLKIT

Claude Code

Your operator. Build, run, and ship, not just chat.

claude.com/download →

VS Code

The free workspace where you build.

code.visualstudio.com →

Vercel

Where you ship your capstone live, free tier to start.

vercel.com →

Docs and pricing

Official Claude Code docs and plan pricing.

docs · **pricing**

5. THE RULES THAT KEEP YOU SAFE

1. **Verify anything that matters.** For any fact, number, or claim: check the source, or do not ship it.
2. **Least privilege.** Give an agent only the tools its job needs. Read-only whenever you can.
3. **You keep the verdict.** AI does the volume. You decide what is right and what ships.
4. **Guard your data.** Never paste customer data, KYC or AML files, internal models, or credentials into a public AI.
5. **Build the judge.** For anything AI generates at scale, write a rubric and grade it before you trust it.

6. WHAT TO USE, AND WHEN

Daily work and building: Claude Code, on the Pro plan. This is the core.

Quick chat and drafts: the Claude app or claude.ai in the browser.

Shipping a product: Claude Code plus VS Code plus Vercel.

Want to explore more, for free: Google Antigravity (Gmail login, no cost). Codex only if you already pay for ChatGPT.

Models: default to the latest and most capable Claude for hard reasoning, and a faster model for routine drafts. Newer models can reason step by step, which helps on logic, math, and code.

7. FOR A BANKING OR FINANCE PM

> A vetted pack of open-source Claude Code skills for finance: AML and KYC, credit risk, SOX close, model risk, and document work, plus a security checklist for using outside skills safely. **Open the banking skills pack →**

8. THE DEMO PROJECT

> **aca-demo** is the tiny project we built from zero in class: a CLAUDE.md, three skills (idea-scorer, prd-writer, acceptance-criteria), one agent (pm-reviewer), and an example data set. It is the smallest complete picture of an AI-native workspace. Copy the pattern for your own first project: one CLAUDE.md, one skill, one agent, one clear task.

Keep in touch. Questions after the course, or want the next cohort? Reach me any time.
